PROJECT EXPERIENCE

CHARToppers, Coding Bootcamp at UCLA (Feb. 2018)

- This project incorporated JavaScript, jQuery, 2 different API's, AJAX, Firebase, localStorage, and Materialize
- Users search and play songs using Last.FM API and YouTube API
- Songs are favorited and saved to localStorage, or shared to the community via Firebase. All songs and comments in community page are visible on any machine
- Link to deployed application: <https://kevinthomaskane.github.io/Project-1/>

Collab, Coding Bootcamp at UCLA (March 2018)

- Full-stack project using NodeJS, ExpressJS, MySQL, Sequelize, Socket.io, Cookies, JavaScript, jQuery, AJAX, and Bootstrap
- Users sign in with unique credentials, create workflows for projects, and collaborate with other registered users
- Users can chat with one another (with Socket.io) and add contributors to their projects
- Link to deployed application: <https://collab-proj.herokuapp.com/>
