Creativity
Problem-Solving

Kevin Kane

Full-Stack Developer

About Me

My name is Kevin Kane and I am a full-stack developer living in West LA. I am very detail-oriented, incredibly focused on the task I am presented with, and enjoy seeing my peers succeed just as much as myself. I have a true passion for JavaScript and love building complex yet practical applications.

My Projects

Collab

- Full-stack project using NodeJS, ExpressJS, MySQL, Sequelize, Socket.io, Cookies, JavaScript, jQuery, AJAX, and Bootstrap
- Users create workflows for projects, and collaborate with other registered users
- Responsible for front-end JavaScript and AJAX requests
- Link to deployed application: collab-proj.herokuapp.com

Squad-Up

- Full-stack project using ReactJS, NodeJS, ExpressJS, MySQL, Sequelize, JavaScript, and Bootstrap
- Users set up events for pick-up sports and invite others to their games
- Responsible for large portion of front-end ReactJS work as well as back-end API routing for invitation functionality
- Link to deployed application: squad-up123.herokuapp.com

CHARToppers

- This project incorporated JavaScript, jQuery, 2 different API's, AJAX, Firebase, localStorage, and Materialize
- Users search for songs and share their favorites with the community
- Responsible for all front-end JavaScript and API calls
- Link to deployed application: kevinthomaskane.github.io/Project-1

Programming Skills

Back-End & Database

ExpressJS
NodeJS
HandlebarsJS
MongoDB
MySQL
Mongoose/Sequelize
REST API Practices

Front-End & Deployment

ReactJS
JavaScript
jQuery
Bootstrap/Materialize
HTML/CSS
Git
Heroku
